About

I am a front-end developer. During my educational journey. Gained experience in creating a responsive and mobile-friendly website. I am currently looking for opportunities to work on real projects or intern at a company where I can continue to grow as a web developer and contribute to the success of a dynamic team, so gaining experience in a skilled development team is my priority goal

Experience

- Extensive experience in Frontend development, supported by recognized certifications from ITI and a grant from NTI.
- Actively participated in React.js-based software development projects, collaborating effectively with standout teams like "Dragons", acquiring valuable skills in technical solution design and implementation.
- Gained practical experience working on multiple development projects, applying concepts and skills acquired through training at NTI
- Highly passionate and committed to continuous learning and personal development in the realm of Frontend interface development, making me an ideal candidate for pivotal roles in innovative tech projects.

Other technical skills

- C++ , Java , Python
- Django , MongoDB , PostgreSQL
- Clean Code , solid principles
- Data structure
- Ccna , linux
